Communication

Date	16 October 2026
Team ID	
Project Name	Personalized Travel Itinerary Planner
Maximum Marks	1 Mark

Communication Plan:

Effective communication is essential for a successful project demonstration. This document outlines the communication strategy used within the team and with stakeholders throughout the project lifecycle, including how updates, issues, and feedback were managed.

S.No	Communication Type	Frequency	Channel / Tool	Participants	Purpose
1	Team Standup	Daily	Notion / GitHub Project Board	Pratyush Kulshreshtha	Daily goal setting, task tracking, and self-review of completed milestones.
2	Progress Update	Weekly	Skill Wallet Portal	Pratyush Kulshreshtha	Submit weekly milestone completion reports and review project deliverables.
3	Issue / Bug Discussion	As Needed	GitHub Issues / Discord / StackOverflow	Pratyush Kulshreshtha	Resolve technical blockers (e.g., Render deployment, Gemini API rate limits).
4	Stakeholder Review	Bi-Weekly	Google Meet / Zoom	Pratyush Kulshreshtha	Demonstrate functional prototypes and align on project requirements.
5	Final Demo Rehearsal	Once	Local Recording	Pratyush Kulshreshtha	Rehearse complete user walkthrough, timing, and presentation delivery.
6	Project Evaluation Sync	Milestone End	Skill Wallet Dashboard	Pratyush Kulshreshtha	Final code submission review, Q&A, and marks assessment.

Communication Challenges & Resolutions:

S.No	Challenge Faced	Resolution / Action Taken
1	Solo Project Workload Management: Managing frontend, backend, and documentation simultaneously without a team to divide tasks.	Created a structured sprint board in GitHub Projects and followed strict milestone deadlines.
2	Asynchronous Feedback Delays: Waiting for mentor responses when encountering complex Supabase RLS and CORS deployment errors.	Documented detailed reproduction logs and used official FastAPI/Render developer documentation for rapid self-debugging.
3	Lack of Peer Code Review: Verifying code quality and edge cases independently.	Implemented automated Postman test collections and manual dry-run testing across multiple browser screen sizes.
